AI Enhanced Course Snapshot

20-minute guided activity

PURPOSE

Explore one area of your course that could be improved or reimagined with the help of AI tools - for learning, feedback, or efficiency.

1 Choose Your Course

2 MIN

Which course will you focus on?

Course title

Semester/Level

2 Identify a Redesign Target

3 MIN

Think of one element of the course that could benefit from redesign.

(Examples: a time-intensive assignment, an area where students struggle, a skill that could be practiced differently, etc.)

Redesign target

Why this area?

3 Prompt an AI Tool

8 MIN

If you have access to ChatGPT or another AI assistant, try prompting it for ideas. If not, jot down what you imagine AI could do.

Sample prompts:

- "How could AI tools help students brainstorm project ideas in a [course name] class?"
- "Suggest three ways AI could support formative feedback on [specific assignment]."
- "Design a low-stakes in-class activity using AI to help students practice [concept/skill]."
- "How could I use AI to give faster, more personalized feedback on [type of work]?"

Most useful ideas generated

Reflect & Sketch

Capture your best redesign idea and its implications.

4 Reflect and Sketch

5 MIN

Use these prompts to summarize your best idea and its implications.

Promising idea

Potential benefits for student learning

Concerns or guardrails needed

One small next step you could pilot

5 Pair & Share

OPTIONAL | 5 MIN

Turn to a colleague and briefly share:

- What part of your course you targeted
- What AI idea you found most interesting
- One next step you might take
