Learning Goals:

This curriculum is designed to allow students to develop the following skills and competencies:

1. Leadership and Decision Making in complex business environments
2. Knowledge of economic frameworks relevant to business strategy within market contexts
3. Strategy formulation and strategic thinking
4. Understanding of organizations and managerial execution within them
5. Development of a Global Outlook and ability to manage in a global economy
6. Technical business skills in the major business disciplines
7. Opportunity for each individual to develop an advanced leadership persona in the areas of communication, presence, etiquette, presentation skills etc.
8. Knowledge of ethics, sustainability and workforce diversity issues.
9. Knowledge of team dynamics and ability to lead and work effectively in teams
10. Ability to work effectively and cross-functionally with other professionals

And the following differentiator:

The Leadership Laboratory is a course that is integrated throughout the entire program and combines individual managerial, leadership development and organizational development into one Leadership Framework course that will position our graduates for maximum effectiveness and success as High Performance Leaders in high performance organizations.

This course seeks to synthesize the broad variety of leadership and organizational models into a comprehensive leadership system.
