

COLLEGE OF NURSING AND HEALTH INNOVATION

The College of Nursing and Health Innovation is a college of faculty, staff, and students who strive to achieve better health and improve the human condition through training and working as health care professionals, research in basic and applied health science, and service to our North Texas community and beyond.

As the **largest producer of baccalaureate-educated nurses in the state** and the **largest nonprofit college of nursing in the U.S.**, CONHI is helping meet the critical demand for nurses. The college enrolls more than **20,000 students every year** and offers a variety of degree programs and certifications to help them prepare for their successful futures.

Recently, both undergraduate- and graduate-level certificates focusing on health informatics, an important and fast-growing field, were added, along with a graduate certificate for diversity and equity in public health. CONHI also launched the **Center for Rural Health and Nursing** to enhance access to health care for Texas' rural communities by supporting efforts to improve rural nursing education.
