

The University of Texas at Arlington is a comprehensive teaching, research, and public service institution dedicated to the advancement of knowledge through scholarship and creative work.

With an enrollment of over **41,000 students**, UT Arlington is the second largest university in the University of Texas System. It offers more than **180** baccalaureate, master's, and doctoral **degree programs**, including areas of critical need in the state and nation, such as public health, elder care, construction management, aerospace engineering, hospitality management, machine-learning systems, and more. In addition to its main campus in Arlington, UTA has a **Fort Worth Center**—where working professionals can earn accelerated degrees in engineering, business, and healthcare fields—and is developing a **UTA West campus** in Parker County to meet the needs of the region's rapidly growing population.

A **Carnegie R-1 "Very High Research Activity"** university, UTA is focused on making an impact through innovative research. Faculty work in areas such as sustainable infrastructure, healthy aging, high-energy physics, cardiovascular disease, flood prevention, and more.
