IN THE SPOTLIGHT

Texas stock exchange gets federal approval as state tries to compete with New York heavyweights:

Coordinated by the UTA media relations team, Sriram Villupuram (College of Business) spoke with the [Texas Tribune](#) about the recently approved Texas Stock Exchange (TXSE). Villupuram discussed how TXSE, set to be headquartered in Dallas, will be able to succeed and become a dominant national exchange. The speed at which TXSE is able to lure its first 50 to 100 companies to the exchange will be crucial, Villupuram said. EXPERT INTERVIEWS

UT Arlington scientists score \$1.84M to study immune system response: [The Dallas Morning News](#) reported and [Dallas Innovates](#) shared a [UTA news release](#) on Saiful Chowdhury's (College of Science) federal grant to study the body's natural defense system. "These insights could lead to new medical treatments for cancer and ... inflammatory diseases," he said.

The moon's craters like you've never seen before: [Science X](#) and [Mirage News](#) shared a [UTA news release](#) about the International Observe the Moon Night event UTA hosted on Saturday, Oct. 4. Levent Gurdemir, UTA's Planetarium director, shared that the waxing gibbous phase is the ideal phase to observe the moon. "It's such a rewarding part of my job to bring people of all ages together to learn more about the world around us," Gurdemir said.

MORE NEWS

Q&A: Breast cancer facts that could save lives: [MSN](#) and [Medical Xpress](#) shared a [UTA Q&A](#) with Zhaoli Liu (College of Nursing and Health Innovation), who has published extensively on breast cancer, answered questions about common myths, warning signs, advancement of treatments and more. "Most cases occur without a family history, and young women can be at risk. Screening and follow-up care are essential. Treatments vary and surgery isn't always a mastectomy," she said.
