IN THE SPOTLIGHT

Data centers want to be sustainable, panelists say. Transparency also in demand:

Facilitated by the media relations team, Muhammad Islam, assistant professor of computer science and engineering, participated on a panel for the [Fort Worth Report](#)'s Informed Discussion series exploring data centers in Fort Worth. "It is bringing a lot of economic activity" to Texas, Dr. Islam said of the industry. "We want to have that, but we have to think about what are the consequences of having data centers."
